Decarbonization Action Plan

Strategic recommendations to reduce the carbon footprint of "mwywmufftt":

- **Optimize Use Phase:** Focus on designing for lower energy consumption during the product's lifespan and encourage end-users to power with renewable energy.
- **Enhance Downstream Logistics:** Implement more efficient last-mile delivery strategies, explore electric vehicle fleets, or promote local pickup points.
- **Increase Renewable Energy in Production:** Strive for 100% renewable energy sourcing at the China manufacturing facility to further reduce Scope 2 emissions.
- **Material Innovation:** Research and integrate alternative, lower-carbon materials or increase recycled content for components like the plastic casing.
- **Strengthen Circularity:** Expand and promote the product take-back and refurbishment program to maximize material recovery and extend product utility.
