# Product Carbon Footprint Dashboard

**Product:** Leather Wallet (1.0 unit)

**System Boundary:** Factory Gate | **Country:** Netherlands

**Total PCF: 17.230 kg CO<sub>2</sub>e**

## Total Footprint

**17.230 kg CO<sub>2</sub>e**

Cradle-to-Gate

## Carbon Intensity

**17.230 kg CO<sub>2</sub>e**

Per 1.0 Unit

## Top Material Hotspot

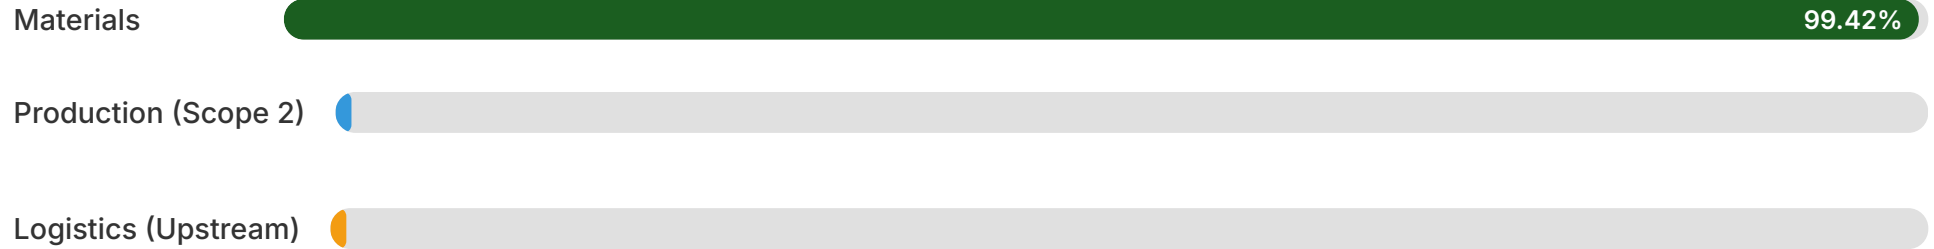

**Leather**

95.76% of Total PCF

## Primary Emission Scope

**Scope 3**

## Lifecycle Stage Breakdown

## Material Carbon Impact Composition

## Key Highlights

- Leather production is the overwhelming emissions hotspot, accounting for over 95% of the total product carbon footprint up to the factory gate.
- The analysis adheres to GHG Protocol standards and incorporates the 2026 Land Sector and Removals (LSR) Standard update, ensuring comprehensive agricultural impact accounting.
