Product Carbon Footprint: hoxvqwwhmf

Company: rwrlinsoj | Standard: GHG Protocol

108.50
kg CO2e / unit

Total Product Footprint

108.50 kg CO2e

This figure represents the total cradle-to-gate with selected downstream modules carbon footprint for one unit of hoxvqwwhmf.

Carbon Intensity

108.50 kg CO2e

per unit

The carbon emissions associated with producing and using a single unit of hoxvqwwhmf, aligning with GHG Protocol standards.

Top Material Hotspot

Lithium-ion Battery Pack

30.0 kg CO2e (27.6%)

This component is the highest contributor to material acquisition emissions, highlighting an area for significant reduction efforts.
